PROFILE

I am currently a student at 42 Vienna studying software engineering through a peer to peer system. After leaving school I gained experience working in a team environment and under pressure in the food industry. I then moved to Austria and solidified these skills in pharmaceutical production. If you decide to get me on the team, you'll have a problem solver with a passion for constant learning and knowledge.

SKILLS

- C/C++ Programming Language
- Bash
- Git/Github
- Linux
- German B1
- AGILE Foundation from RBI
- Team Work
- Problem Solving
- Strong Communication
